

The new UX ECO Special means more for less

4 February 2015 by AMAZONEN-Werke H. Dreyer

Introducing the new UX 3200 ECO Special - and at just £29,950 nett on-farm it is very special indeed!

With its upmarket specification but downmarket price, the UX 3200 ECO Special offers real value for money and yet still packs in the features. Designed to fulfil the demand from growers for a smaller trailed sprayer that can increase output over and above a mounted sprayer, so meaning less fill ups, but still have a compact, manoeuvrable machine, this new, well-equipped entry-level 24 metre-boomed model is available with immediate effect and comes as standard to the following specification:

The **UX3200 ECO Special** has a 3,200 litre nominal (3,600 litre actual) spray tank capacity, a 320 litre fresh water tank and is equipped with a 24m Super-L2 24m three section boom with hydraulic folding, boom tilt & changeover valve (3 d/a spools required)

The standard triple nozzle bodies come with 1 set of AirMix 04 flat fan nozzles fitted and a second free set of Billericay bubble jets are available on application.

Road lighting is standard along with hydraulic brakes and 300/95 R46 tyres on 10 stud rims. Tracking is provided by the excellent simple UniTrail mechanical axle steering system. Mounted on the lower link arms of the tractor, the swivel drawbar pivots when turning on the headland - forcing oil to the slave cylinders on the rear axle making them follow the tractor's rear wheels exactly. On the headland the tracking system can be over-ridden to allow the sprayer to be backed into a corner. The parking stand makes for an easy demounting. Wide angle PTO shaft, a 260 l/min pump with PTO drive as well as a 5-section shut-off TG valve chest are also standard.

Control of the sprayer is via an AMASPRAY+ in-cab terminal with speed-related spray rate & 20 field record memories, switch-over between folding and tilt is provided by an on-screen changeover valve button to reduce the total number of spool valves required on the tractor.

NSTS testing, clothing locker and 8m long, 3" suction hose with basket filter are also included as part of the package - and with 3 annual payments at 0% on 50% of the RRP, what more are you waiting for? Get down to your local Amazone dealer and snap up a bargain or contact us for more information.

Terms & conditions apply – the UX 3200 ECO Special offer is not available as part of any other sprayer promotion, pictures are for illustration purposes only and are not necessarily representative of the offer above. Finance is for business purposes only.
