

KUKA with great exhibition success at 2015 Metal + Metallurgy China

9 April 2015 by KUKA

KUKA Robotics recently showcased three state-of-the-art robots at the 2015 Metal + Metallurgy China (M+M) from March 31st to April 3rd 2015 at the newly built China Expo Complex in Hongqiao Shanghai, China.

Within KUKA's 144 sq.m bright orange-colored exhibition area, the German automation company demonstrated the outstanding performance of its robot products and applications including KR 16-2 and KR 60-3, KR 150 R2700 EXTRA F and KR 30-3 F for the foundry and metal casting industry.

KUKA received the Platinum Sponsorship Award from the 2015 Metal + Metallurgy China organizing committee which really showed KUKA's commitment in China as a global pioneer of robot development and manufacturing. Former Secretary of Commerce, President of Association for Relations across the Taiwan Straits, **Deming Chen** has also visit the KUKA booth at the M+M exhibition to recognize the company's achievements in the industry.

Rated as Asia's largest and the world's second largest expo in the metal and metallurgical industry, Metal + Metallurgy China has gained global prominence and high recognition in the hot metal processing and metallurgical industry in the world. The exhibiting space exceeds 80,000 square meters.
