

Brand New FOTON LOVOL Tractors in International Agriculture Equipment, Technology and Machinery Exhibition of Indonesia 2015

1 September 2015 by LOVOL

The annually International Agriculture Equipment, Technology and Machinery Exhibition was held in Djakarta, capital of Indonesia during August 6-8, 2015. FOTON LOVOL International Heavy Industry Co., Ltd. (hereinafter referred to as FOTON LOVOL) exhibited its TB454, TD824 and TD1004 tractors to make overseas customers feel the charm of leading Chinese brands. The three tractors became the most shining parts during this Exhibition.

It is understood that the International Agriculture Equipment, Technology and Machinery Exhibition is the largest and the most professional exhibition for agricultural machinery in Indonesia. Over 300 exhibitors across the world participated into the Exhibition which attracted 25,000 professional visitors from 27 countries to come. The Exhibition was very influential. The report saw FOTON LOVOL's Stand was swarmed with visitors under discussion and consultation. A local customer told the reporter: "I'm a loyal fan of FOTON LOVOL. I bought one set of 50HP LOVOL paddy field tractor, and no fault has happened ever since. I come here to see FOTON LOVOL's new products and want to buy one set of 80 horsepower tractor for transportation."

FOTON LOVOL tractors can often be seen in palm fields and cane fields with good performance in orchard transportation after they entered Indonesia in 2006. In particular, 40-100HP tractors are quite locally popular and their market shares are always rising. FOTON LOVOL continues developing Indonesian markets. As for the operations in Indonesia, FOTON LOVOL has made a planning combination for machine types to be exhibited in advance to provide overall solutions of brand new and totally mechanized farmlands and orchards for customers. In spite of numerous international leading competing goods, FOTON LOVOL can be comparable to major brand products with new technology upgrading and superior quality.
