

Dammann Mercedes-Benz Unimog ExpertPartner

17 September 2015 by Herbert Dammann GmbH

On the demo Park on 22 June 2015, the Herbert Dammann GmbH was officially appointed Mercedes-Benz Unimog ExpertPartner. As part of the demonstration park has added 13 companies to the circle of Mercedes-Benz Unimog ExpertPartner. Under the motto „It's better together“ builds Mercedes-Benz, the partnerships with the purchase and bodybuilder for the Unimog even further. Here the Herbert Dammann GmbH is a true partner for Mercedes, because at Dammann is set to the Unimog since the outset, beginning with structures for crop protection, and later also expanded for winter maintenance and railsprayer.

Herbert Dammann began in 1968 to build on his first sprayer on a Unimog, this was the beginning of 1979 based engineering firm Herbert Dammann GmbH. Since this time, the Unimog is a component of the company's history and was then crowned with the award this year. From this partnership, Dammann promises advantages in marketing and in the development, together with Mercedes-Benz in vehicle technology. Customer requirements for comfort, reliability and precision technology is offered with this partnership, together with other partners from among the partnership. Dammann is a specialist in high precision distributing liquids, this is winter maintenance, for example, supplemented by snowblowers or snowploughs of partners from among the Partnership.
