

Metso to supply containerized crushing and screening plant to Saburkhan Technologies, allowing for cost efficiency and rapid plant set up

30 November 2015 by Metso

Metso received an order for a Metso NW220GPD(TM) portable crushing and screening plant to be delivered to Saburkhan Technologies at Aktas, Saran city, Kazakhstan. This order is among the first containerized wheel-mounted crushing plants to be transported overseas. The innovative mobile features of the Metso NW220GPD(TM) allow the equipment to be dismantled and packed into standard sea containers for easier, faster and more cost-efficient transportation.

"We were looking for an affordable and user friendly solution that would also allow for efficiencies in our operations. The Metso NW220GPD(TM) portable crushing and screening plant was the right solution for us," says Berkut Mainin, Technical Director, Saburkhan Technologies.

The order will be included in Metso's Q4 2015 orders received. The value of the order is not disclosed. The delivery will take place by January, 2016.
