

Welcome to Alimak Hek at Bauma!

16 February 2016 by Alimak Group

Bauma 2016 will take place from 11 – 17 April 2016 in Munich, Germany. Bauma is the largest and perhaps the most impressive trade fair in the world. You will find Alimak Hek's trade stand in the open air area, south, stand number FS.1102/10. There, we will be happy to show our new product developments and the advantages they have to offer. We look forward to welcoming you to our stand and the opportunity for further discussions.

New Mast Climbers, Hoists & Crane Lifts

Alimak Hek's latest mast climbing work platform, construction hoist and tower crane lift models offer simplicity of operation and ease of installation at a highly competitive price. These models represent the next stage in the expansion of Alimak Hek's product portfolio, delivering on the Company's commitment to quality, productivity and safety.

- The new HEK MC 650 & 450 are the latest generation in mast climbing work platforms, balancing performance, quality and efficiency in all types of façade work.
- The latest heavy-duty and medium-sized hoist models, the ALIMAK SCANDO 65/32 & 45/30, offer efficient vertical access for passengers and materials on even the most challenging construction sites.
- Designed for the fastest installation available on a range of tower crane systems, the new ALIMAK TCL lift provides reliable and smooth access for crane operators.
- A 2016 upgrade of the ALIMAK SCANDO 650 delivers improved userfriendliness, safety and productivity.
