

Kleemann agrees strategic cooperative venture with FLSmidth

9 May 2016 by Kleemann (WIRTGEN Group)

Kleemann GmbH, a member of the Wirtgen Group and specialist for mobile screening and crushing plants, and FLSmidth, the global expert in the cement and mineral industry, have signed a cooperation agreement. The central element of the agreement is the supply of cone crushers to Kleemann, as well as the joint further development of these crushers.

The agreement between Kleemann GmbH and FLSmidth has advantages for both parties: With Kleemann's expertise in the mobile processing of rock and stone and FLSmidth as a technology leader in the development of cone crushers, the synergies can be optimally used within the construction machinery and rock processing industry.

"In the future mobile cone crushers will play an increasingly important role in our product portfolio. That's why we sought an expert who will advance the development of cone crusher technology together with us. We have found the ideal partner with FLSmidth, who boasts many years of experience in this field", states Dr. Volker Nilles, Technology Manager at Kleemann GmbH.
