

Liebherr breaks new ground with customers at Hillhead 2016

11 July 2016 by Liebherr

This year's Hillhead show was extremely positive for Liebherr-Great Britain with the Liebherr stand busy on all three days. Numerous enquiries were received from existing and potential customers with some enquiries covering three sectors of Liebherr's construction product portfolio. Particularly strong interest was shown in the XPower, the tracked excavators, the recently-launched Mobilmix 2.5 concrete batching plant and the new quick release hatch on the truck mixers.

Inclement weather did not dampen interest in all that Liebherr had to offer at Hillhead 2016. The Liebherr stand was busy on all three days of this year's Derbyshire-based international quarrying and recycling show with Liebherr products generating genuine interest from visitors.

Numerous enquiries were received from both existing and potential customers and in some instances these enquiries covered three sectors of Liebherr's product portfolio: cranes, concrete technology and earthmoving machinery.
