

Earthmax SR 45 plus, BKT's good giant

11 May 2016 by BKT

At its first appearance in public at Bauma 2016, the Giant tire, Earthmax SR 45 Plus, cannot be missed, thanks to its stunning dimensions showing off a diameter of 2.70 meters. It will be displayed in the outdoor area in size 27.00 R 49.

Specifically designed for rigid dumpers, it is a true giant with scores of qualities, such as outstanding stability, excellent grip and extraordinary resistance, which are all essential features to manage long-haul material transport.

The All Steel casing structure provides Earthmax SR 45 Plus with maximum stability making it particularly resistant to cuts, tears and abrasions in any operating conditions.

In addition to extraordinary traction, this radial tire features a particular tread design which ensures excellent self-cleaning properties. It also minimizes vibration and noise, while riding rigid dumpers on the road – essential features that are appreciated by operators on long-haul transports.

The Giant tire, Earthmax SR 45 Plus, epitomizes BKT's evolution as a company that has undoubtedly entered the league of the big market players.
