

# RUTHMANN rolls out NEW STEIGER TBR 250

13 September 2016 by Ruthmann

## Breaking news with IAA

It is here! This follows on from our revelation a few weeks ago of our intention to introduce an innovation in the segment 'light **telescopic working platform mounted on truck**, with movable working basket (Jib)' on a 3.5 t chassis with EURO 6 which justifies our current slogan '(R)evolution'.

Meanwhile, our developments have progressed so far that we will be able to report already on the 3.5 t **working platform for trucks** with working basket with the highest working height/ best performance data on the market during the IAA commercial vehicles exhibition in Hannover between September 22 – 29. Moreover, the STEIGER®'s TBR 250 will be launched at the IAA as well.

Further details regarding the new STEIGER® model will be revealed exclusively on our IAA booth at the open air area FG N 66 and later on during the follow-up reporting.
