

HA20 RTJ PRO Articulated Boom 20m A compact with big attributes!

4 April 2016 by Haulotte

The new rough-terrain articulated boom 20 m reflects Haulotte's commitment to providing simple, robust, reliable and high-performance machines.

Haulotte: 30 years of experience with customer-driven approach, illustrating with this AWP, its commitment to optimizing productivity, addressing customer budget constraints and ensuring operator safety.

The new HA20 RTJ range

- an ideal combination performance-weight
- the best level of comfort and ease of use
- a guarantee of a high level of robustness, durability and ease of maintenance

The ideal combination performance-weight

Excellent working envelope

- Working height 20.6 m
- Horizontal outreach 12.1 m
- Up and over clearance 8.1 m

Excellent productivity

- The HA20 RTJ offers the best lifting speed of the market in 48 seconds providing time saving benefits and productivity.
- Like HA16 RTJ, this new articulated boom has an exceptional capacity of simultaneous movements
The HA20 RTJ PRO can overcome all rough terrains and offers one the best ground clearance on the

market.

Smart transportability

- Its optimized weight (less than 9.5 tons) gives it a real competitive advantage
- Ultra Compact thanks to a transport's height of 1.8 m and a length of 6.4 m, it allows to streamline transportation costs by allowing load 2 machines on a low flat bed trailer.

Comfort driving and ease of use

- Flexible in lifting as at is in driving, HA20 RTJ provides smooth outreach capacity with a high accuracy in the defined work area.
- Ergonomics of the upper control box make it easier for the operator to understand intuitively how to use the machine; the joystick is handled with one hand making it possible to hold onto the guardrail with the other.
- New tool tray, whose ergonomics has been carefully studied, brings more convenience for operators through various compartments: ideal for always having the right tools at hand.

Durability, reliability, ease of maintenance: a streamlined investment

Designed to last, HA20 RTJ's features include

- Protection of the upper control box and tool tray using a new material for unmatched robustness!
- Anticorrosion treatment applied on all pivot pins and non-painted parts, increasing their durability by 3.
- Fully protected load management system: damage by potential impact is now avoided.
- Reinforced hoods, conferring excellent rigidity.

Easy and fast maintenance thanks to a combination of characteristics

- Fully modular platform: 8 elements independently replaceable as well as a standard size of sections of guardrail making it easy to repair
- Direct access to key components and regular check pint (engine, hydraulic and electric components)
- Swing out engine tray
- Pre-diagnostic screen and plugs to allow the connection to Haulotte Diag in order to achieve a advanced diagnosis when needed.

Enhanced Safety

To alert the operator of potential risk of crushing, the HA20 RTJ is equipped with the unique secondary guarding device Haulotte ACTIV'Shield® Bar (standard equipment on the PRO model, optional on models RTJ and O).

HA20 RTJ is a versatile machine for multiple applications:

Building works, Finishing, Demolition, Maintenance, Landscaping and tree surgery, Sporting and other events.
