

The First XCMG Multi-Purpose Crawler Crane XGC100HD Goes Offline

14 October 2016 by XCMG

Recently, XCMG's first multi-purpose crawler crane XGC100HD has been offline successfully in the Crane Machinery Business Unit, which not only further makes a segment for construction machinery, but also embeds a seed for XCMG's leading development in the industry.

XCMG XGC100HD multi-purpose crawler crane, by adopting the international mature technologies, is equipped with the "controllable power free-fall winch load quick-release flexible brake, limit load control in any complex operation mode" and other key technical advantages, while the boom, crawler beam and other structural parts use general design methods to reduce the product risk to a minimum. With strong power of this enhanced version, it will be able to match with lifting, grab bucket, piling and other working conditions, and have a reserved interface to adapt to working conditions with great demand in domestic market such as fully casing drill, casing oscillator and so on.

XCMG XGC100HD multi-purpose crawler crane has surpassed some imported equipment in terms of lifting performance, construction efficiency, and filled up the gap of current demands for multi-functional cranes in domestic market. Afterwards, XCMG crawler crane equipment will be run-in strictly in accordance with appropriate program to verify product performance, improving everything unreasonable and affecting product quality. The XGC100HD has been made as safe, reliable and high-quality competitive equipment with first-class performance.
