

Product Innovation Award for Telehandlers from ALH

25 October 2016 by Magni Telescopic Handlers

In occasion of the second ALH Conference & Awards in Miami, conference sponsored by KHL Group, with hundreds of attendees, included many worldwide known rental companies, Magni Telescopic Handlers was awarded for the "Product Innovation Telehandlers" for our new range of handlers.

The judges said of our product: *"This is a great product. The technology inside the cab makes it high-tech, but Magni has successfully harnessed that technology to make the machine very user-friendly. The judges have been in the cab and learned its operations very quickly. It is a great example of innovation in the service of the user."*

We are very proud to be the winner of this award as it symbolize the achievement and acknowledgement of what we constituted in these 4 years activity; period in which we built the **widest rotating range** on the market, including the model **RTH 5.39S**, that is the **highest telescopic handlers in the world**.

To collect the award for Magni Telescopic Handlers there was **Mr. Jorge Salas**, our Sales Director for the new subsidiary Magni Americas in Miami, where we have technicians and warehouse; and **Mr. Vince De Rienzo**, from Paramount Equipment, our sole distributor the East coast.
