

Talson to present air-cargo trailer solutions at International Air Cargo Forum in Paris

24 October 2016 by Talson Trailer B.V.

Europe's leading air-cargo semi-trailer manufacturer Talson announced today that it will participate in the upcoming 28th International Air Cargo Forum and Exhibition 2016, in Paris, between October 26 and 28.

TIACA's (The International Air Cargo Association) biennial International Air Cargo Forum and Exhibition is the leading air cargo industry event, rotating every two years between Europe, the Americas and Asia. Over 3,000 air cargo decision makers and more than 200 exhibitors from around the world gather at the event.

Talson offers compact trailer solutions with flexible options for the most efficient transportation of air-cargo since 1982. Its air-cargo trailer segment covers trailers for the transport of both dry and perishable goods, including pharmaceuticals, electronic devices, flowers, fresh aliments and valuable goods.

Talson Trailers are renowned for their self-supporting upper-structure, offering the highest possible loading capacity and for their concorde roof, providing an optimum overall height for easier loading and unloading.

Every Talson air-cargo trailer is equipped with rolling tracks for increased efficiency during loading/unloading operations and the roller bed auto-down function for the safety of the driver, cargo and the vehicle.

In the last round of IAA Commercial Vehicle Show in Hannover, Germany back in September this year, Talson exhibited its FNA Class ATP-Certified Talson Air-Cargo semi-trailer with enhanced security features, including the IQ Ultimate Security System, Online Security Management System, Online Temperature Management and improved security against thefts.

Talson will present its unique product range and trailer solutions at its booth at No. 675 in International Air Cargo Forum and Exhibition in Paris.
