

Riwal supplies aerial work platforms to Brand

2 November 2016 by Riwal

Riwal, the aerial work platform and telehandler rental and sales specialist, has delivered 49 JLG aerial work platforms to Brand Energy & Infrastructure Services in the Netherlands, a provider of specialty services to the energy, industrial and infrastructure markets. Riwal is the JLG distributor for the Netherlands and Poland.

The Brand deal consists of a variety of JLG telescopic booms, articulating booms, electric scissor lifts and vertical mast lifts. The deal follows a delivery of 40 JLG's to Brand in 2015.

Remon Scheper, Riwal's International Key Account Manager, comments: "We are very pleased with the continued trust that Brand has put in Riwal. Not only does Riwal offer the latest JLG models to Brand, we also provide after-sales service and parts to ensure maximum equipment uptime."

Arie Offermans, Technical Advisor at Brand Energy & Infrastructure adds: "Brand decided to do another investment in JLG aerial work platforms from Riwal because of the high quality equipment and excellent technical support."
