

Palazzani reaches Canada!

1 November 2016 by Palazzani Industrie S.p.A.

The first three units recently entering Canada are TZX 225 crawler version with ECO power execution, TSJ 23.1 and XTJ 32 both in crawler version and Hybrid power execution. This important step was possible thanks to the new cooperation with Up and Down Lifting Solutions.

Based in St. Clements, the Canadian Company is specialized in limited access lifting equipment, with the largest fleet on Mini cranes and Spider Lifts in Canada. Up and Down Lifting Solutions was established 6 years ago but the family has over 35 years of experience in the Crane rental business.

The machines operate on various different jobs and applications. Further to the wide variety of customers in all areas of construction and maintenance, Spider Lifts are becoming very popular in the tree care business; many of the existing customers are looking forward to using some of the larger models Palazzani has to offer.

"The reliability and ease of operation were the main factors in choosing the Palazzani machines" says Jimmy Latta, the Sales Manager of the Company. "As a rental company, we need machines that are very user friendly and easy to operate. We have already had great feedback from many of our customers regarding the performance and ease of operation of these machines. Palazzani also offers a wide range of models from 17-52 meters and this was very important as we look to expand our fleet of larger machines".

The hydraulic winch option was another very interesting item. "The option to add the hydraulic crane function the lift was also a huge factor in selecting these machines. We have over 60 cranes in our current rental fleet and this option will provide us some very unique solutions for our clients".
