

Visit Spearhead Machinery at IOG SALTEX 2016

9 November 2016 by Spearhead Machinery Ltd

IOG SALTEX 2016 will be held at the NEC Birmingham on the 2nd and 3rd November and is the UK's national event for grounds care, sports, amenity, estates and green space management.

Spearhead Machinery will be attending SALTEX 2016 for the second year running with a range of machinery that will suit any amenity or ground care contractor needing a compact but tough product that leaves a flawless finish to be proud of.

SALTEX 2016 looks to be even better this year with a new Outdoor Demonstration area and Pathology & Soil Science LIVE

Rollicut 170

On display will be the **Rollicut 170** which is an ideal match for compact tractors, needing only a minimum power requirement of 35hp.

Robustly constructed and fitted with Spearhead's signature three blade rotor design – including high-lift suction blades – the heavily baffled rotors provide a high speed chopping action that pulverises grass in to a fine mulch and distributes the chopped cuttings evenly behind the machine.

Alongside the Rollicut Spearhead will be displaying it's **Outfront Flail** mower and the neat and manoeuvrable Twiga 320.

Outfront Flail

Matched to most forward control tractors, the Spearhead **Outfront Flail** mower delivers consistently high output in wet or dry conditions, long grass or shot, fine turf or rank weeds.

Cutting cleanly with scoop type flails that revolve at 2000rpm, this high rotor speed and enhanced flail shape together create a significant updraft to raise any flattened material to ensure every stem of vegetation is cleanly cut and mulched.

TWIGA 320

The **TWIGA 320** – part of the TWiGA Compact range – incorporates the same robust technology as its larger siblings to bring enhanced levels of durability and reliability in a neat and compact package.

An industrial grade reach mower, the **TWIGA 320** can be fitted with a wide range of attachments – including the HC 130 Rotary Head which will be shown on stand – giving the operator added flexibility and increased utilisation to satisfy all contracting needs.

Spearhead Machinery can be found on stand L107 at SALTEX 2016 where the team will be on hand to show visitors around the Amenity range and answer any questions.
