

New FALCON for Sky Access in Switzerland

3 February 2017 by FALCON LIFTS

The rental company Sky Access in Switzerland has increased their rental fleet of FALCON SPIDER machines with the new generation of FALCON.

One more unit of FALCON SPIDER platform has been delivered to Sky Access. The FALCON SPIDER FS330Z with 33 meters working height and 19 meters outreach on crawler chassis. The FALCON SPIDER is equipped with dual power system, and wireless remote control for all functions.

“Especially the “Falcon Service Tool”, which offers distance monitoring and on-line trouble shooting, and service back-up via GSM module, was an important feature for Mr. Martin Vögtli”, Brian Falck Schmidt explains.

“The company has been one of our customers for many years, and we are proud to continue the relationship”, Brian Falck Schmidt explains, “and we are very glad that Sky Access now wants to expand their fleet with another FALCON machine.
