

Young used machines and an extensive range of rentals: SENNEBOGEN Rental & Used commences

21 June 2017 by SENNEBOGEN Maschinenfabrik

SENNEBOGEN Rental & Used offers its customers an interesting portfolio of material handlers and cranes with its extensive rental park and attractive range of used machines. The company thus supports customers and distributors by providing machines at short notice for bridging or for a project-related rental. The range is supplemented by a growing pool of used machines for end customers and distributors.

The new SENNEBOGEN Vertriebs GmbH & Co KG, in short SENNEBOGEN Rental & Used, regards itself as a partner for the rental of machines from the SENNEBOGEN product portfolio and the distribution and marketing of used machines. With currently more than 50 available rental machines and a growing range of young used and refurbished material handlers and cranes, the company offers customers and distributors an interesting range to react quickly to project inquiries, to rent bridging machines and demonstration machines or to open up new business fields.

"We see ourselves as an extension to the existing range by being able to help our global customers even better with an extensive rental park and by reacting in a flexible manner to jobs and projects." explain both directors, Dr Andreas Maurer and Alfred Endl.

The range of rental and used machines focuses on the product portfolio of SENNEBOGEN Maschinenfabrik GmbH and includes material handlers, telescopic cranes, crawler cranes, duty cycles cranes and telescopic loaders. Short delivery times and good availability of rental machines enables the customers to avail of the necessary machines quickly and easily for a multitude of uses. Even machine applications with limited running times are carried out quickly and easily with the SENNEBOGEN Rental & Used range.

A competent team is on hand for consultation and design purposes according to the customer's individual requirements. Customers can now view the available machines immediately on our website and request an individual quotation.
