

Kito Europe at Motek 2017

1 September 2017 by Kito Europe GmbH

As one of the world's leading suppliers of electric and hand chain hoists, KITO EUROPE will exhibit at a Motek 2017 in Hall 7, Booth 7606. The international trade fair for automation in production and assembly offers visitors the opportunity to experience the high quality of KITO products. Interested experts will be able to learn everything about the modern, highly flexible and customer-specific KITO systems and will be able to discuss own ideas with the team.

KITO EUROPE – products with highest quality standards KITO CDER2 electric chain hoist ergonomic cylinder control will be presented as a highlight at the trade show. The chain hoist can be operated live on site. This hoist is particularly suited for applications requiring the automation of repetitive transport tasks and is mainly used in the handling technology. It is ideal for quick operation of transporting a smaller load over a shorter path. E.g. at places, where many components have to change position quickly. Transport and positioning of light loads over short distances can be implemented quickly and user-friendly with the cylinder control.

Also **KITO EDC electric chain hoist** with cylinder control can also be used in comparable situations. At Motek, **KITO LX lever hoist** and **CX hand chain hoist** can also be examined as light and powerful lifting tools.

As a Japanese high-tech manufacturer, KITO stands for innovation, precision and trust. The hoists and cranes daily move millions of tons of heavyweight in industries such as the automotive industry. KITO EUROPE not only delivers standardized products, but also develops individual solutions for every industry with its partners.

You will find KITO EUROPE in Hall 7, Booth 7606 at Motek 2017.
