

Metso presents latest innovations for the mining industry at Perumin 2017

20 September 2017 by Metso

At Perumin, one of the main mining exhibitions in Latin America, Metso will introduce its latest innovations for exceeding the mining industry's efficiency, productivity, and sustainability targets. Perumin 2017 will take place in Arequipa, Peru, on September 18-22.

"Perumin is a strategically important event bringing together decision-makers and influencers from the mining industry in the region. We will be showcasing our latest differentiators, covering both equipment delivering profitable, long-term solutions, as well as services that significantly improve plant availability. Our team of most experienced specialists is keen to discuss these topics and the major trends shaping the industry," says **Aldo Cermenati**, senior vice president for the Pacific Rim market area at Metso.

At Metso's booth, visitors to Perumin will have the possibility to learn about the Metso's offering, ranging from energy-efficient, heavy-duty MDR350 mill discharge slurry pumps and patented Energy-Saving Idlers (ESI) to variety of mining applications. Metso will also take part in number of technical presentations, panel discussions and "Lunch-and-learn" sessions covering the latest themes and trends in minerals processing.

Metso Peru has been serving the local mining industry for nearly 30 years. In Arequipa, Metso operates a Service Center. Altogether Metso has around 260 specialists in Peru helping mining and aggregates industry customers increase profits, improve operational efficiency, and reduce risks by utilizing Metso's unique knowledge, experienced people, and innovative solutions to find new ways of growing together.

At Perumin 2017, the Metso solutions will be displayed at Booth 1044 in Exterior Pavilion II. For further information on the event program (in Spanish), please visit our local website.
