MECALAC believe that innovation is speeding up the move towards building sites that are less harmful to people and the environment

For a very long time now, we at Mecalac have been thinking about the environment and sustainable development as an investment and a key issue for the future, rather than as an expense, even in the field of internal combustion engines. [Read more >>](#)

Volvo CE's fully-electric compact excavator prototype wins Intermat Innovation Award

Volvo Construction Equipment's fully-electric compact excavator has won an Intermat Innovation Award for its revolutionary design. The EX2 prototype delivers zero emissions, 10 times higher efficiency, 10 times lower noise levels and reduced total cost of ownership. [Read more >>](#)

New John Deere 344L Compact Wheel Loader with Articulation Plus™

Combining speed, precision and exceptional lift capacity, the new John Deere 344L compact wheel loader provides peak productivity for ag material handling, landscaping, snow removal and construction customers year-round. Industry-exclusive features on the 344L help operators move faster and remain comfortable on the job site while increasing machine uptime. [Read more >>](#)

Hitachi ZX210LC-6 offers exceptional versatility to Dutch contractor

A Hitachi ZX210LC-6 medium excavator is offering Arco de Visser BV the highest levels of versatility on a challenging project in the province of Zeeland, The Netherlands. The company's owner, Arco de Visser, has been using the machine to build a trench for a small canal at the Zonnedorp campsite in the coastal village of Renesse, as well as complete landscaping tasks at the five-hectare site. Yanmar C30R-3 and C30R-3TV: Your perfect partners for narrow jobsites

Yanmar has a long history of cultivating and incorporating new technology. Therefore, even in narrow and difficult urban construction sites, you can get the job done with overwhelming ease and comfort. Why don't you try a state-of-the-art carrier with high effectiveness, operability and flexibility? The C30R-3 is a very compact carrier for its class. It has a total width of 1.5 meter allowing this machine to be efficient even on very small jobsites. A total length of 3.28 meters (standard) and 3.64 meters (turning) makes it easy to turn in every condition, especially with the feature that this machine can spin-turn 360°. This configuration offers an increased efficiency and an increased productivity for the operator. [Read more >>](#)

CraneWorks Denver add 8 Demag® Mobile Cranes to inventory

CraneWorks, Inc., one of the United States' leading suppliers of lifting equipment, placed an order for eight various sized Demag ® cranes, including three AC 45 City models, two AC 220-5, and three AC 100-4 all terrain cranes for its Denver, Colorado location. According to CraneWorks CEO, Keith Ayers, the company is currently seeing an increase in demand for all terrain cranes and received a lot of praise from customers who have had a chance to use other Demag cranes in their rental fleets.
