

Linden Comansa will be exhibiting at the Big 5 Heavy show in Dubai

1 March 2018 by COMANSA

Tower crane manufacturer and dealer AREMATES will show one of the models of higher demand in Emirates, the 16CM260 12t flat-top crane

The Big 5, a brand of reference in the Middle East with regard to construction fairs, is organizing the Big 5 Heavy show, an event dedicated solely to machinery for public works and construction, and independently to other fairs for the first time. For this reason, it is expected that this event, which will be held from March 26 to 28 at the Dubai World Trade Center, will be one of the main meeting points for the construction market not only in Emirates but in the Gulf.

AREMATES distributor of Linden Comansa in the United Arab Emirates, will be promoting its services of rental, sale, assembly and maintenance of tower cranes at stand OS A40 of the outdoor area, where will be exhibiting the model 16CM260 12t together with Linden Comansa. Thanks to its 12 tons of maximum load and a maximum reach of 70 meters, this flat-top crane meets the requirements that are currently most demanded by the construction market in Emirates, Saudi Arabia, Egypt, Oman...

For the exhibition visitors to closely see the design of the 16CM260 without cat-head and Linden Comansa's exclusive double trolley system, the crane will be displayed with a special configuration of only 7 meters in height. In a jobsite, this model can reach 64.5 metres of freestanding height with a standard mast configuration, and exceed 100 metres with special configurations.

With its participation in the Big 5 Heavy show, Linden Comansa hopes to continue to expand in this booming market.
