

Weekly overview 5.-9.11. 2018

9 November 2018 by LECTURA GmbH

Karsten Elles, Business Development Manager, Komatsu Europe International N.V. in an interview with LECTURA Press

Komatsu presented the PC210LCi-11 with iMC at last years' CeBit 2017. Intelligent construction machines are already established machines in countries like Japan. How is the European market reacting to intelligent construction machines? [Read more >>](#)

MAXIMA 3

KUHN innovates with the official launch of the new MAXIMA 3 range. This range of precision seed drills meets all the requirements of modern farm operations. It includes models from 6 to 12 rows for drilling maize, sunflower, beetroot and other crops with spacings from 37.5 to 80 cm. [Read more >>](#)

ROPA reaps the benefits with Volvo Penta

Through innovative thinking and a continual drive to improve its machines, family-owned harvester manufacturer ROPA has grown into a thriving global business. A collaboration with Volvo Penta is helping the German company gather a growing share of the market. [Read more >>](#)

Weidemann in the Heavyweight Class

For particularly heavy materials handling, as constantly occurs, for example, in silo operation on large farms or biogas plants or with a high number of large bales, Weidemann has, to date, only been able to offer a 7.0 t wheel loader or 7.2 t telescopic wheel loader. Weidemann will now fundamentally change all that, with the new 90 series. [Read more >>](#)

Alliance Tire Group at EIMA: Focus on soil protection, versatility, durability and best value for money

From 7th to 11th November 2018, Alliance Tire Group will use EIMA at Bologna to showcase some of the manufacturer's outstanding tires for agricultural, horticultural and municipal uses. As a leading innovator in IF and VF tire technology, Alliance Tire Group will display a high-performance Very High Flexion tire: Alliance 372 Agriflex+. [Read more >>](#)

Case IH Maxxum 145 Multicontroller awarded Tractor of the Year and Best Design title for 2019

The Case IH Maxxum 145 Multicontroller has been awarded the title of Tractor of the Year 2019 and Best Design 2019 at an award ceremony on the first day of EIMA International, the farm equipment show, in Bologna, Italy. [Read more >>](#)

Yanmar's Industrial Diesel Engines Get Certification for EU Stage V Emission Standards

Yanmar has released a list of diesel engines manufactured by the company that are certified for compliance with the European Stage V (EU Stage V) off-road emission standards set to come into effect from 2019. Yanmar has acquired certification not only for the stricter NOx*1 and PM/PN*2 standards imposed on the 19kW and over range, but also for the newly imposed emissions standards for the under 19kW range. The list of certified Yanmar diesel engines is shown in the table below. [Read more >>](#)

John Deere extends fuel guarantee to the field

John Deere has announced that as of 1 November 2018, the company's Fuel Guarantee Programme will apply to field as well as road work. Owners of John Deere 6R, 7R and 8R Series six-cylinder tractors will be eligible to take part in the extended programme, which rewards customers financially for fuel-efficient driving.
