

Yale solutions on show at VINITECH-SIFEL 2018

19 November 2018 by Yale

Official Yale® dealer Adour Manutention is set to exhibit Yale solutions for the beverage industry at Bordeaux's leading wine fair.

2018's VINITECH-SIFEL - the international exhibition for the wine industry and largest trade fair in southern Europe - will be held in Bordeaux from 20-22 November. For some years now, VINITECH-SIFEL has been considered as one of the leading international launch pads for future-oriented investments in the wine, fruit, and vegetable industries. Covering a surface area of 65,000 sqm, last year's fair broke all records with 850 exhibitors and 45,000 visitors.

This year the fair is divided into four areas, each focusing on a different part of the supply chain. Adour Manutention will be based in 'Techniques Culturelles' showcasing a selection of Yale solutions handpicked for the wine industry.

Adour Manutention has time-honoured expertise in the materials handling sector, with a focus on the sale, rent, repair, maintenance of equipment. The company also offers a complete materials handling solution for customers, including equipment testing, warehouse configuration, and consultancy services based on over 40 years of experience from a knowledgeable team. Adour Manutention will be displaying Yale products for the first time at VINITECH-SIFEL in Hall 1 - Stand 1D1505.

The VINITECH-SIFEL Yale line-up will include the Yale MS Series pedestrian stacker, a VT Series 3-wheel electric counterbalanced forklift with rotator attachment and an MP Series pedestrian powered pallet truck.

The MS Series is composed of eight models ranging from MS10-20 to MS12-16IL with a lift capability of up to two tonnes, making the range suitable for a variety of applications including supermarket storage rooms, small-scale warehouses, cold stores and retail operations.

Combining high performance and energy efficiency, the Yale ERP15VT is the most ergonomically advanced 3-wheel forklift truck for medium to heavy-duty applications. Adour Manutention plan to pair the truck with a special rotator attachment for VINITECH-SIFEL. The attachment allows the load to be rotated 360 degrees, making it ideally suited to beverage processing and container emptying.

The MP16 powered pedestrian pallet truck completes the dealer's product selection. The Yale range of powered pedestrian pallet trucks features Yale Smart Lift™ and Yale Smart Slow Down™ technology to

improve operator productivity. Yale Smart Lift™ helps the operator to lift and move loads, resulting in increased productivity due to reduced cycle times, whereas Yale Smart Slow Down™ assists the operator in maintaining stability of the truck and load when taking corners. Also available in a cold store version, the pallet trucks are ideal for retail applications as well as off-loading into stores, lorry and van loading and all those operations that require shorter usage time.

Adour Manutention looks forward to sharing the Yale vision at VINITECH-SIFEL later this month.
