

Topcon Positioning to showcase automation in construction workflows at bauma 2019

1 March 2019 by TOPCON

Topcon Positioning Group will be unveiling several new technologies at Bauma 2019, demonstrating how integrated software and hardware systems can help to significantly increase productivity and efficiencies across an entire construction project workflow.

At this year's event, taking place between 8 – 14 April at the Messe München trade fair centre in Munich, Germany, Topcon will reveal new technologies including Pavelink, the logistics, planning and scheduling software to provide end-to-end visibility in the paving process; automated excavator, haul truck and drill rig machine control solutions, new developments for the Sitelink3D site management system and other integrated positioning solutions.

The latest launches from Topcon are all designed to further facilitate the automation of construction workflows. Topcon articulates its focus as supporting the industry at the Intersection of Infrastructure and Technology – providing the technology and knowledge that will be crucial to meeting the future demands for new and improved infrastructure assets.

Carsten Frantzen, EMEA construction lead, Topcon Europe Positioning, said: "The adoption of new and emerging digital technologies will be crucial for the construction industry to meet the ever-growing demand for maintaining and creating new infrastructure globally.

"Alongside our partners, such as Komatsu, John Deere, Wirtgen Group, Volvo and JCB, as well as with the cooperation and presence of Bentley, Autodesk and RIB software solutions in our booth, we will be showcasing our leading-edge construction solutions and latest innovations. Visitors will be able to speak directly with our teams to explore how Topcon technologies can better manage their data, machines, and crews to improve efficiency and accuracy."

During Bauma, Topcon will feature these directions in an interactive and engaging way to end-customers, OEM, press and media. Earthworks, paving and construction building business get focus.

The entire German and wider-European team as well as Topcon thought leaders will be present. Interviews, quotes, statements and in-depth discussions are welcome to be set up.

Topcon is positioned on the main isle in **Hall A2**.

Planning your visit

Venue: Exhibition Grounds Messe München / ICM – Internationales Congress Center, München, Am Messesee, 81829 München

Dates: 8 – 14 April 2019
