

Celebrating 60 years of CECE

4 December 2019 by CECE

The construction equipment sector is a very important part of European economy. The companies represented by CECE provide local jobs and contribute to local economies throughout Europe. We, the construction equipment manufacturers, help citizens across the globe in building houses, offices, factories, roads, railways, bridges. Manufacturers invest and innovate continuously to deliver equipment with highest productivity and lowest environmental impact. Efficiency, safety and high-precision technologies are key.

CECE has been the voice of construction machinery manufacturers in Europe for 60 years and throughout those years we have immensely contributed to the development of our industry in Europe. In the light of this year's institutional changeover, we believe that now, more than ever, we need to have the construction sector's voice heard and work together towards strengthening the industry.

Throughout the year CECE has marked this sublime anniversary on several occasions. In April, during bauma trade fair, CECE President Enrico Prandini hosted a Celebratory Cocktail Reception. Stefan Rummel, Managing Director of Messe München made a special appearance to congratulate CECE on this distinct anniversary.

In October, in the framework of CECE Summit 2019, the 60th Anniversary Dinner took place, where CECE President gave a speech bringing CECE's most memorable moments to the attention of Summit's guests.

We would like to thank our members, partners and colleagues for the 60 years of fruitful collaboration. We are looking forward to many years of work to come!
