

Anmopyc members dealing with the present time to ease the worldwide health crisis - IMPLASER

9 April 2020 by Anmopyc

ANMOPYC member **IMPLASER** continues on working as a key activity company to meet the urgent demands.

To answer the need of protective measures for several sectors as the medical and pharmaceutical, security and forces agencies, feeding, transportation and all involved professionals, IMPLASER has developed a face shield to minimize the possibility of COVID 19 transmission.

It is not considered as a PPE (personal protective equipment) as it is not certified, but it can be offered to customers and used by operators.

The member company **BEZARES** is providing aid to health centers and nursing homes:
