Introducing the MJ55 jaw module

Designed around our proven, high-performance JW55 jaw crusher, the Terex MPS® MJ55 Modular Jaw Crusher is designed for large quarries or contractors that want a stationary type design without the complexity of a normal stick-built plant. [Read more >>](#)

BEUMER Group: belt conveyors instead of trucks - an efficient alternative?

Recovered raw materials have to be transported from the quarry to the factory or port, often over uneven ground and across populated areas. Companies often choose trucks for transportation. As an alternative, system suppliers including **BEUMER Group** offer open troughed belt conveyors or closed Pipe Conveyors.
