

Jungheinrich to Appear at LogiMAT 2014

2 December 2013 by Jungheinrich

The Hamburg-based enterprise is returning to LogiMAT in Stuttgart to showcase its intelligent, innovative solutions for intralogistics applications involving the use of materials handling equipment.

Jungheinrich will appear at two separate exhibition stands at the 12th International Trade Fair for Distribution, Materials Handling and Information Flow – LogiMAT 2014 (Feb. 25-27), where it will highlight its intralogistics solutions expertise. In keeping with the trade fair's slogan of "Intelligent networking: Mastering complexity", the Hamburg-based company will present its entire range of industrial trucks and intralogistics solutions on over 330 square metres of floor space in the stacker hall (hall 6, stand 201). There, trade visitors will be treated to exhibits which include the winners of the IFOY Awards 2013; the DFG/TFG 540s counterbalanced forklift and the ETV/ETM 216 reach truck.

Jungheinrich will also be exhibiting in the LogiMAT software hall (hall 5, stand 421) with its own stand where, on almost 100 square metres of floor space, it will showcase its expertise in software and IT hardware for warehouse applications. Visitors will be able to witness live demonstrations of integrated, holistic intralogistics solutions for manual and fully automated warehouses and see first-hand how projects can be successfully implemented in just eight weeks' time.

Tradeshows visitors will also find a series of intelligent solutions involving the use of industrial trucks to improve warehouse process efficiency at the Jungheinrich stands. This includes wireless data transmission, a truck guidance system, logistics interface and the Jungheinrich WMS warehouse management system. The Jungheinrich presentation will be rounded off by services involving material flow analysis, leasing and after-sales service as well as used equipment and the company's Online Shop.

Jungheinrich ranks among the world's leading companies in the material handling equipment, warehousing and material flow engineering sectors. The company is an intralogistics service and solution provider with manufacturing operations, which offers its customers a comprehensive range of forklift trucks, shelving systems, services and advice. Jungheinrich shares are traded on all German stock exchanges.
