We welcome three new members. Thank you for your confidence!

ACCESUS

Accessus is the combination of a big team of professionals dedicated to the design, manufacture and sale of suspended platforms, special scaffolding, safe access systems for work at height and special access for people.

Born in 2009, Accessus team has more than 10 years of experience offering quality, design and safe solutions.

They are specialized in works at height and difficult access, so what define them most are rigorousness in the manufacture and approval of our products and protocols.

Its value proposition is to be able to offer visitors and potential customers that Accesus is a company that offers high quality and versatile products, specially designed for the construction, industry and civil engineering sectors.

Accesus products are useful in a wide range of sectors such as wind power (for the maintenance of wind turbines), industrial (for work in chimneys, blast furnaces, tanks, silos,...) and civil works (buildings, houses, bridges, dams, among others).

Its products have a great versatility and modularity, so they are compatible with each other and allow, with very little investment, to add parts and get new products with different applications.

MAQUINTER

More than 50 years focused in the industry of public works, construction and mining machinery and equipment, support Maquinter as an expert in identifying and meeting customer needs.

They offer the flexibility needed to adapt to the market rapidly changing needs, trying to satisfy all its demands.

The quality of its brands not only regarding the design, reliability and profitability but also specially in after-sale service made Maquinter as a reference within the sector.

50 years of friendship, confidence, respect and professional behaviour with customers and suppliers.

ASCENDUM

Since its origins in 1959 in Portugal under the designation *Autosueco*, the international growth and consolidation of Ascendum has been sustained. The internationalization process started in 1999 with the arrival to Spain of the company that is currently present in 14 countries. It has consolidated during these years a clear reference in the sector of public works, construction, industry, handling, mining, recycling and agricultural machinery and equipment and the others.

Ascendum has a joint business network in Spain comprising its own facilities, dealers and supporting services. This makes a total of 28 service points to guarantee a quick and efficient service for its customers.

In 2012, they underwent a substantial transformation process, setting up a holding, the reconversion to S.A. (Stock Corporation) and changing the name held up to the moment to Ascendum Group.

They consider as fundamental values the environmental sustainability and the social commitment; their interest in the development is always based in ensuring a sustainable future.

They have a management system that is externally audited in accordance with to RD 39/1997 and a Quality Management System Certificate complying the Standard ISO 9001:2015.
