New Bobcat Products at LAMMA - Telehandlers & Much More

17 March 2022 by Bobcat

- R-Series Telehandlers Joined by New Compactors and Attachments -

As well as **Bobcat's** new generation R-Series agricultural telehandlers, visitors to the LAMMA show on 4-5 May 2022 will be able to see new light compaction machinery and some of the latest tool carriers and attachment products on the company's stand (Hall 19 Stand 19.200).

Bobcat will be showing two new R-Series telehandlers for the first time at a UK show at LAMMA - the top-of-the-range TL43.80HF and the compact TL30.60 telehandler, both in Agri 4 Star specification.

Also debuting at LAMMA will be the new range of light compaction products from Bobcat. Altogether, the Bobcat light compaction range comprises **seven different product families** and **37 models**, from vibratory

rammers weighing 29 kg up to 2.6 tonne tandem rollers.

New Bobcat attachments will be an important feature of the LAMMA stand. Demonstrating just how flexible the company's mini-excavators have become as Tool Carriers, Bobcat is presenting a new range of flail mower attachments for the first time at LAMMA. Bobcat is also premiering a new family of Pressure Washer Attachments for Bobcat loaders at LAMMA.

Revolutionary 'Next is Now' Continues to Expand Bobcat Range

The new R-Series telehandlers and light compaction products are part of Bobcat's revolutionary 'Next is Now' programme, combining innovative product development and diversification with more intelligent, more

connected technologies and services that reshape how work gets done on the farm.

Under the Next is Now umbrella, Bobcat has also recently entered the European wheel loader market for compact wheel loaders and small articulated loaders, as well as launching new generation R-Series compact loaders and R2-Series 5-6 tonne mini-excavators.

Commenting on the leading edge Next is Now programme, John Christofides, Regional Sales Director for Bobcat EMEA s.r.o., said: "As the UK's leading farm machinery show, LAMMA is the perfect platform to give farmers their first close look at our ground-breaking Next is Now products, including the new R-Series telehandlers and the light compaction range. With Next is Now, Bobcat is empowering people to work more efficiently with an enhanced and much wider choice of products to increase opportunities for our customers."

Seven Agricultural Telehandlers with lifting heights from 6 to 8 m

On standard 24 inch tyres, the TL43.80HF offers a maximum lift capacity of 4.3 tonne, a maximum lift height of 7.5 m and a maximum forward reach of 4.0 m. The TL30.60 has a maximum lift capacity of 3.0 tonne, a maximum lift height of 5.9 m and a maximum forward reach of 3.0 m.

Including these models, Bobcat's R-Series agricultural telehandler range provides a choice of seven models with Stage V engines, covering maximum lifting capacities between 2.6 and 4.3 tonne with lifting heights from 6 to 8 m and comprises the models below:

Compact models – TL26.60, TL30.60 and TL30.70

Large models – TL35.70, TL34.65HF, TL38.70HF and TL43.80HF

New R-Series Cab Offers Premium Workspace and Operator Experience

Bobcat R-Series telehandlers offer a premium workspace with a new cab design. The new high quality, contemporary interior of the cab features stand-out R-Series branding, colours and textures that clearly reflect Bobcat's DNA. In the ergonomic design, all surfaces have been optimised to offer increased space and visibility, whilst control switches are colour grouped depending on their functions.

A new Grammer Maximo Dynamic air suspension seat with heating, featuring a suspended armrest with joystick provides an outstanding ride and high operating comfort. The new Bobcat multifunctional joystick enables faster operations. The FNR button located at the back of the joystick is easily controlled using the index finger, allowing the operator to use their thumb to actuate the usual boom and auxiliary functions and

new smart functions such as the Auto Grab, the bucket shaking feature, the boom float and the speed shifting system.

Standard 3-Year Warranty Included

As with all new Bobcat telehandlers, the R-Series offers customers peace of mind with a 3-year warranty (or 3000 hours) on the entire machine as standard from the factory, extendable to 5 years and 5000 hours. Bobcat is the only manufacturer to provide a 3-year warranty as standard, allowing customers to focus entirely on growing their farming business without worrying about their machines.

New Light Compaction Range

The new light compaction range from Bobcat is designed to meet work requirements on almost any compaction job site. Machine specifications include state of the art technologies that allow maximum performance, while not compromising on comfort, safety and simplicity of use.

The Bobcat Light Compaction Range includes:

- Vibratory rammers
- Vibratory forward plates
- Reversible vibratory plates
- Hydrostatic plates
- Walk behind rollers
- Trench rollers
- Tandem rollers

New Bobcat Attachments

The new flail mower range has a number of unique features on the market such as a 12 second drum stop after the power is switched off, no need to drain lines as this is integrated in the attachments, a self-levelling system for following the ground surface as a standard feature and the best balanced motor design in order to cut the grass while travelling.

Also joining the Bobcat family of over 100 different kinds of original attachments, the new Pressure Washer Attachment is the first of its type to be offered for skid-steer, compact track and all wheel steer loaders on the market. There are three different Pressure Washer Attachment models - the 250S, 250M and 250L - to match different Bobcat loaders and to meet the specific requirements of the many different applications for the attachment which include cleaning animal or poultry sheds.
