Sinoboom BV introduce new equipment at Vertikal Days 2022

4 May 2022 by Sinoboom

Equipment new to the UK market will be on display at the **Sinoboom** booth in the upcoming 2022 edition of Vertikal Days, including the first Sinoboom electric telescopic boom lift to land in Europe.

Sinoboom will once again be sharing its booth with GB distributor Pinnacle Platforms, and has an all-electric line-up of models representing a wide range from its diverse product line. Varying applications are catered for with the machines on show, from micro scissors and vertical mast lifts widely used in indoor narrow-aisle environments, to rough-terrain scissors, articulating boom lifts and heavy-duty boom lifts with 454kg loading capacity. All models carry superior battery technology designed for longer run-times, and are built to Sinoboom's customary high standards, with electrophoretic primer treatment protecting against corrosion.

The models fresh for the UK are:

TB20EJ Plus telescopic boom lift – 20m platform height, loading capacity of 300kg/454kg (unrestricted/restricted), and enhanced stability over uneven terrain with 45% gradeability, patented ant-skid technology and active oscillation.

AB18EJ articulating boom lift – 18m platform height, 230kg loading capacity, and enhanced lifting efficiency – 0-18 meters in on 68 seconds. As with all Sinoboom boom lifts, it features an intelligent 7-inch display for easy real-time viewing of machine status, parameters and settings and fault diagnosis, allowing for easier, quicker maintenance.

5389RE rough-terrain scissor lift – 16.2m platform height, 680kg loading capacity, 40% gradeability, 1-click levelling with oscillating axle. Designed to withstand the demands of frequent use in diverse conditions, and built for optimal working efficiency, with two-way extendable platform to accommodate more workers, materials and tools.

Alongside these, other popular Sinoboom models in the European and UK market will be the 1330se and 1932ME compact scissor lifts, and ML10EJ vertical mast lift which was recently revealed to the UK by Pinnacle Platforms at the Executive Hire Show.

The teams from Sinoboom and Pinnacle Platforms can be found at stand 507, close to the Market Place pavilion. Vertikal Days takes place over 11-12 May at the East of England Showground, Peterborough.
