3 years in the market, 20 years experience in leasing

20 July 2022 by Solutions Rental

Through the experience acquired in more than 20 years in the leasing, sale and maintenance of mobile elevating work platforms, Solutions Rental - SR arrived in the market just over 3 years ago to fill the gap left by large rental companies and provide a more personalized service compatible with the reality of businesses that need to rent or purchase quality equipment at more competitive prices.

With a bold strategy, SR is always ahead of the competition when it comes to bringing innovations in MEWPs and advanced technology. It was the first rental company to offer the Haulotte Sigma 16 articulated aerial work platform and to acquire the first scissors sold by Zoomlion in Brazil, which have a lithium battery (model ZS1212DC-Li), a revolution in the segment. And now, it has just added to its fleet the first DaVinci AE1932 in the country, a scissor lift manufactured by JLG, the first 100% electric in the world market.

SR also marks its trajectory with a highly specialized team, ready to meet customer demands with excellence and a constant training. The rental company also stands out for the investments in its headquarters, which moved to a new address in a much larger area and became self-sufficient in energy with the installation of solar panels. Its fleet has more than tripled in 3 years. And since the beginning of 2022, SR has become an affiliated member of IPAF to provide world-class safety trainings to its clients.
