Bobcat Launches New MT100 Loader at Galabau 2022 Fair

24 August 2022 by Bobcat

Bobcat will be exhibiting at the **Galabau Exhibition** in Nuremberg in Germany from 14-17 September 2022. At the show, the company will be presenting a range of new products for landscaping, gardening, horticulture, construction, rental and other industries. Bobcat will launch the new **MT100 mini track loader** and preview the company's mower products. The latter form part of the new **Bobcat Grounds Maintenance Equipment range** being launched in 2023.

New MT100 Mini Track Loader

The new MT100 mini track loader removes the need for manual labour, replacing the use of wheelbarrows, shovels and hand tools in many types of work. The tracks on the MT100 allow travel over established surfaces with less worry about repairs and costs associated with surface damage.

The compact dimensions of the MT100 provide easy passage through narrow gates and doorways and facilitate work in confined spaces. In addition, the MT100 shares many of the same attachments found on other small Bobcat loaders such as buckets, trenchers, breakers and sweepers using the same standard Bob-Tach system.

Preview: Bobcat To Enter Grounds Maintenance Business

As Bobcat continues to enter new product categories to strengthen its position in the compact equipment industry, the company will be entering the **Grounds Maintenance market** in 2023 with a **new product range** to complement its current portfolio. At Galabau, Bobcat is giving a preview of the company's new mowers, part of the range that also includes **new compact tractors and turf equipment** alongside the company's **mini track loaders, small articulated loaders** and related attachments.
