## Weekly overview 21.11.- 25.11. 2022

25 November 2022 by LECTURA GmbH

**Successful TOBROCO-GIANT investment in electric machines results in rapid growth**

G2200E with hydraulic feed and manure scraper

IMAGE SOURCE: TOBROCO-GIANT

**TOBROCO-GIANT** delivers 1000th end customer sold electric wheel loader to Brdr. Holst Sørensen A/S, responsible for the Danish and Swedish markets. The company has been a loyal customer of TOBROCO-GIANT for more than 20 years and the first export customer of TOBROCO-GIANT. Meanwhile, this collaboration has resulted in more than 5000 wheel loaders sold in this region. Because of the special bond between the two companies, the 1000th machine was offered by director – owner Toine Brock and his wife Caroline Brock. [Read more >>](#)

## Cone Crusher Proves Itself in the Production of Railway Ballast and High-Grade Chippings

The MCO 90i EVO2 and MS 953 EVO are connected with one another by line coupling.

IMAGE SOURCE: WIRTGEN GROUP

A company near Berlin is using the cone crusher MOBICONE MCO 90i EVO2 from **Kleemann** for recycling and the production of crushed rock and high-grade chippings. Since summer 2021, the first plant of this type worldwide has been recycling mainly railway ballast. The screening plant MOBISCREEN MS 953 EVO operates downstream of the cone crusher. **Electric, emission-free and innovative as always**

Weidemann Hoftrac® 1190e

IMAGE SOURCE: Weidemann GmbH

Those who want to avoid CO<sub>2</sub> emissions, noise and soot particles in buildings and while working can go for the fully electric 1190e from **Weidemann**, allowing you to work on site completely emission-free and with considerable reduction in noise (zero emission). This also takes care of the rider as well as the valuable livestock equally well in the agriculture as well as the horse industry. In the municipal sector, this results in specific aspects for use of machines in the cemetery office, in the building yard or in the inner city green zones. In hotel, commercial and industrial sectors, an emission-free and quieter work are also playing an increasingly important role. [Read more >>](#)

## AutoTrac for the WR series

The new Wirtgen AutoTrac system for the WR series impresses with its ability to conserve resources and increase efficiency.

IMAGE SOURCE: WIRTGEN GROUP

In view of growing demands for environmentally compatible processes, the need for responsible handling of valuable resources is also increasing in the areas of soil stabilisation and cold recycling. Cost-effective realisation of these processes is only possible when they are efficiently executed. With the launch of the AutoTrac system for the WR series, it now offers a technology that focuses on precisely this. [Read more >>](#)

## Hitachi presents versatile Zaxis-7 wheeled excavator at Bauma

Hitachi ZX150W-7 wheeled excavator

IMAGE SOURCE: Hitachi Construction Machinery (Europe) NV

The new **Hitachi** ZX150W-7 wheeled excavator offers an extensive range of features designed to help owners and operators control their profitability, comfort, safety and uptime. The highly versatile model is also provided with unrivalled levels of support throughout its life cycle. [Read more >>](#)

## **MOLDTECH supplies two tilting tables in Guanajuato, Mexico**

MOLDTECH

IMAGE SOURCE: MOLDTECH

Moldtech has supplied 2 tilting tables for panels 36 meters long and 3.5 meters wide to Mexico. [Read more](#)
