Spross Triples Down on Investment in Safe Sorting with ZenRobotics

Spross Triples Down on Investment in Safe Sorting with ZenRobotics

IMAGE SOURCE: ZenRobotics

Swiss-based, family business, Spross Transport & Recycling AG has further invested into **ZenRobotics** robot technologies to recover more valuable fractions at their Spross Recyclingwerk Zurich RWZ site. This facility processes 180,000 tonnes of construction waste and bulky household waste annually. [Read more >>](#)

RTITB Endorses New Warehouse and Logistics Exhibition for 2023

Laura Nelson, Managing Director, RTITB and Justin Craig, CEO, IWLEX

IMAGE SOURCE: RTITB

RTITB has confirmed its support for IWLEX 2023 (Inside Warehouse and Logistics), a new B2B conference taking place from 23rd – 24th May at the Telford International Centre. “Among IWLEX’s core pillars are inclusivity, innovation, sustainability, and wellbeing, all of which particularly resonated with what we believe in as a business,” [Read more >>](#)

New Waste and Recycling Kit for Doosan Wheel Loaders

New Waste and Recycling Kit for Doosan Wheel Loaders

IMAGE SOURCE: DOOSAN INFRACORE EUROPE S.R.O.

Doosan has launched a new Waste and Recycling Kit for the company's award-winning DL-7 range of wheel loaders. It is the first kit of its type for Doosan wheel loaders and is designed to help operators work safely in the hazardous conditions that often accompany waste handling and recycling applications, including contending with airborne dust, dirt and other dangerous particulates and materials. Customized rail undercarriage and electric motor: perfect combination in port handling

Thanks to the 835 E with powerful electric drive, tons of bulk material are handled efficiently

IMAGE SOURCE: SENNEBOGEN Maschinenfabrik GmbH

For bulk handling by the ton in the port, Schlüter for construction equipment delivered a new **SENNEBOGEN** electric material handler to Freiberg to Valet u. Ott GmbH & Co. KG. Thanks to the installed electric drive, the 835 E not only impresses with its low operating costs, but also with its special rail undercarriage, which was specially adapted to the rails already existing in the port at the customer's request. Why should I choose a self-propelled sprayer?

ALPHA evo III wheat field

IMAGE SOURCE: HARDI INTERNATIONAL A/S

The sprayer is often the most used implement on the farm and is, therefore, an important investment. A self-propelled sprayer will very quickly show a positive return on investment on any farm of 1000 hectares or more, reducing the amount of time spent spraying. It is not just the advantage of reducing time – the self-propelled sprayer's manoeuvrability also improves accessibility. [Read more >>](#)

The Fliegl SKATE – now even better

SKATE SD with 187.5mm tube spacing

IMAGE SOURCE: Fliegl Agrartechnik GmbH

The trailing shoe distributor SKATE will adapt even better to uneven ground in the future. In addition, with the SKATE 150 model, a smaller distance between the trailing shoes can be selected. Manure is valuable.

Applying your nutrients in a targeted and dosed manner is the benchmark for modern fertilizer technology.

Fliegl provides significant support here with well thought-out spreading technology close to the ground. [Read more >>](#)

New Holland Agriculture debuts world's first LNG tractor

New Holland T7 Methane Power LNG Tractor

IMAGE SOURCE: New Holland Agriculture

The importance of energy is at a historic peak. New and efficient ways of generating, using, and storing energy are required to address this global issue. CNH Industrial keeps its customers moving forward with smart and sustainable equipment and services. Always advancing and evolving to deliver future-proof solutions for farmers, the Company's long-term R&D investment in alternative fuels is part of what makes us the industry leader in agriculture.
