CNH Industrial presents first electric tractor prototype with autonomous features

New Holland T4 Electric Power

IMAGE SOURCE: CNH Industrial N.V.; New Holland Agriculture

CNH Industrial revealed the **New Holland** T4 Electric Power – the industry’s first all-electric light utility tractor prototype with autonomous features – at its Tech Day in Phoenix, Arizona, USA. A concentrated effort between our team of experts in the USA (Burr Ridge, Detroit) and Italy (Modena) was able to halve this prototype’s development time...[Read more >>](#)

HVO now usable on all Haulotte Internal Combustion booms

HVO now usable on all Haulotte Internal Combustion booms

IMAGE SOURCE: Haulotte Group

(Hydrotreated Vegetable Oil) is now authorized for use on all **Haulotte** internal combustion (IC) machines. The switch from diesel to HVO is an opportunity to significantly reduce CO₂, NO_x and particle emissions. Haulotte customers now have the choice to fill their machine with diesel or HVO100. This oil is mainly found in Europe. Some countries such as Finland & UK, have put in place tax incentives to promote this greener fuel. [Read more >>](#)

First practical application of MOBISCREEN MSS 802i EVO in Germany

With the well thought-out design of the mobile screen for coarse elements MOBISCREEN MSS 802i EVO, the best possible material flow in natural stone and recycling applications can be guaranteed.

IMAGE SOURCE: WIRTGEN GROUP

Since 2021, the new screen for coarse elements from **Kleemann** has been processing a large number of different materials in Neumünster. Flexibility is required. Whereas sand and fine-grained material are found in the gravel quarry, the screening of rubble and railway ballast is required in recycling applications. The plant is even used for the processing of topsoil, which is often highly cohesive. [Read more >>](#)

From One Job to the Next with the PALFINGER FLC 253 Truck Mounted Forklift

From One Job to the Next with the PALFINGER FLC 253 Truck Mounted Forklift

IMAGE SOURCE: Palfinger AG

It's powerful, maneuverable, and versatile — the **PALFINGER** truck mounted forklift FLC 253. It demonstrates everything it can do when deployed to job sites in Sweden. No construction site is too small, too narrow or too challenging. Quickly unloaded from the truck, it completes its tasks in record time. [Read more >>](#)

Hexagon opens advanced heavy construction test site for hands-on technology demonstrations

The enhanced T-Site allows customers and employees to test Hexagon's hardware and software solutions first-hand

IMAGE SOURCE: Hexagon Geosystems

Hexagon's Geosystems division today announced the opening of its newly enhanced test site where customers, partners and employees will be able to experience the company's heavy construction solutions in a real-world environment. The "T-Site" is located at Hexagon's machine control facility in Odense, Denmark.

Once it's secured, it won't let go

Once it's secured, it won't let go.

IMAGE SOURCE: MB Crusher

Hand precision but tears and disassembles like a machine, said three of our customers—operators of earth-moving equipment who demolished buildings. All had the same objective - to demolish and recover as much material as possible in total safety - and with the same type of equipment: an **MB Crusher** sorting grapple.
