JCB engine breakthrough proves hydrogen has wider appeal

JCB has installed its hydrogen engine into a 7.5 tonne Mercedes truck

IMAGE SOURCE: JCB

JCB has made a major breakthrough in proving the wider appeal of hydrogen combustion technology by installing one of its super-efficient hydrogen engines into a 7.5 tonne Mercedes truck. The retrofit was completed in just days and one of the truck's first test drivers was JCB Chairman Anthony Bamford, who has been spearheading the company's £100 million hydrogen project. Hiab launches new 90 tm heavy loader crane — EFFER iQ.950 HP

EFFER iQ.950 HP

IMAGE SOURCE: Hiab

Hiab, part of Cargotec, launches EFFER iQ.950 HP, a 90 tonnes metre (tm) heavy range loader crane with the V12-Power boom profile and the new advanced operating system SPACEevo. It is a multi-purpose crane suitable for a wide range of vertical and horizontal lifting jobs that can be performed safely and precisely even at high speeds. [Read more >>](#)

New mobile Stackers MOBIBELT for optimised logistics

The mobile stackers MOBIBELT MBT 20(i) and MBT 24(i) from Kleemann make large stockpiles and improved work site logistics possible.

IMAGE SOURCE: WIRTGEN GROUP

The mobile stackers MOBIBELT are used for efficient logistics processes on work sites. They flexibly extend the action radius of crushing and screening plants and thus make large stockpiles and improved work site logistics possible. Nowadays modern crushing and screening plants regulate material streams within the plant to a large extent automatically. [Read more >>](#)

Goldhofer PST/SL-E 8 heavy duty module in action for the Kiel Canal Waterways and Shipping Authority

The PST/SL-E self-propelled module towing the ferry on the upper cradle ashore

IMAGE SOURCE: Goldhofer Aktiengesellschaft

Ferries themselves have to be transported at regular intervals. This was recently the case for the Kiel Canal Waterways and Shipping Authority at the Yard in Rendsburg, where a new procedure was implemented for the first time as a faster and more practicable method of moving vessels ashore for inspection purposes. Everything to play for in Vegas

Everything to play for in Vegas

IMAGE SOURCE: Yanmar Compact Equipment

The industry has weathered a range of crises since the last CONEXPO-CON/AGG. While uncertainties remain, there is a lot to be optimistic about, says Tate Johnson, President of **Yanmar** Compact Equipment North America. The last CONEXPO was marked by Covid-19, with the world literally shutting its borders as the week-long show progressed. [Read more >>](#)

Many new features in earthworks and asphalt construction

Hamm is presenting numerous new series and models at CONEXPO/CON-AGG 2023: The HC CompactLine series, the HC series, electrically driven compact rollers from the HD CompactLine series, the HX series, the HP 100i articulated pneumatic-tire roller, and the HTC 15 trench roller (from top left to bottom right). They are also presenting a tandem roller from the HD+ series with two VIO drums.

IMAGE SOURCE: WIRTGEN GROUP

Hamm is presenting a packed program at Conexpo/CON-AGG 2023, including several world premieres as well as innovative further developments. The spectrum of innovations ranges from electrified tandem rollers, compactors, pneumatic-tire rollers and pivot-steered tandem rollers, right through to the Smart Doc compaction app for self-monitoring and documentation. SENNEBOGEN expands crane range with the introduction of the 80 t telescopic crawler crane 683 E

With the market launch of the new 683 E, SENNEBOGEN unveils its new 80-metric-ton crawler telescopic crane. The new machine complements the existing product portfolio perfectly and attracts particular interest due to its boom length of up to 57 m and numerous equipment variants.

IMAGE SOURCE: SENNEBOGEN Maschinenfabrik GmbH

SENNEBOGEN has added another model to its range of telescopic crawler cranes: the 80-tonner 683 E. With its load capacity of 80 metric tons and a main boom length of 42 m, the ninth model in the series fits perfectly into the gap between the existing 673 E and the 6103 E and belongs to the manufacturer's medium-size class.
