TVH expands range of spare parts for backhoe loaders

27 February 2023 by TVH

Parts specialist **TVH** has announced it is further expanding its range of products for small earth-moving equipment (SEM). TVH already offered parts and accessories for three types of small earth-moving machines (up to ten tonnes): mini-excavators, skid steer loaders and compact track loaders. To this it now adds parts for backhoe loaders. This move enables TVH to further enter the new adjacent market of small earth-moving equipment.

"We are continuously expanding our product range - especially within small earth-moving machinery", says Joris Tijtgat, Market Management Specialist for SEM at TVH. "Whether that is with new parts, new brands or new equipment. Our in-house experts keep a close eye on the market and respond to all trends and developments within the small earth-moving equipment sector. But our customers' needs and expectations

always come first. That is why we now also offer parts and accessories for backhoe loaders."

OVER 4 MILLION KNOWN REFERENCES

Backhoe loaders are equipped with a bucket on the front and a backhoe on the rear. That makes this vehicle a very versatile machine. They are suitable for all kinds of earth-moving jobs in demanding environments. Joris explains: "With one and the same machine you can perform different tasks and therefore backhoe loaders can be used everywhere, such as in public administrations, in road works, in (agricultural and garden) construction etc."

By adding parts and accessories for backhoe loaders to its range, TVH can offer more than four million known references for the SEM market. The company processes more than 300 000 orders for the small earth-moving market every year.

MOST PARTS AVAILABLE FROM STOCK

"The focus for the development of the range of parts for backhoe loaders will initially lie on the machine makes JCB, Case, Caterpillar, John Deere, Volvo, Bobcat and Kubota. We proactively search for the best parts and accessories for those makes. As a result, most of these parts are already in stock, even before there is demand for them, and we can deliver very quickly. But when a customer needs a part from another make like New Holland, Komatsu, Terex ... our in-house experts will of course help them quickly with that too", Joris adds.
