Boden & Bauschutt: Material Flow Platform of the Future

13 April 2023 by Boden & Bauschutt

Boden & Bauschutt is the platform by and for mineral professionals. We get the material cycle going for the construction and waste disposal industry: thanks to our BB-Cockpit, mineral waste can be recycled easily and inexpensively while resources are conserved.

As a company funded by the German Federal Ministry for the Environment, we also develop other solutions for the construction and waste management industries that support companies in the sustainable use of valuable resources.

Boden & Bauschutt pursues the cooperative approach and involves the industry as owners in the development of the solutions
