steinexpo 2023: Alternative drive technologies for Liebherr machines in the mining industry

Alternative fuels such as HVO can already power a large proportion of Liebherr machines, either in pure form or as an additive to fossil-based diesel.

IMAGE SOURCE: Liebherr

As one of the largest manufacturers of construction machinery, **Liebherr** is continuously working on drive technologies with the aim of offering its customers efficient and environmentally compatible products in the long term. [Read more >>](#)

World's largest duty cycle crane in demolition works with 10 t wrecking ball at a height of 75 m

For the demolition of the thermoelectric power plant in Porto Tolle, Ferraro is using the SENNEBOGEN 6300 HD, the only duty cycle crane in demolition that can still operate a wrecking ball weighing up to 10 t at a height of 75 m.

IMAGE SOURCE: SENNEBOGEN Maschinenfabrik GmbH

The site of the former thermoelectric power plant in the Venetian town of Porto Tolle is to be revived and transformed into an ecologically sustainable vacation resort. Before that, however, the decommissioned power plant has to be dismantled. [Read more >>](#)

Two powerful Liebherr wheel loaders at steinexpo 2023

Liebherr, L 546

IMAGE SOURCE: Liebherr

Liebherr is presenting two powerful wheel loaders from two different series at this year's steinexpo, the international demonstration trade fair for the raw materials and building materials industry. [Read more >>](#)

GRI Advancing use of Recycled Carbon Black for a Greener Future

GREEN XLR EARTH agriculture tire

IMAGE SOURCE: GRI

GRI is increasing its efforts in utilizing Recycled Carbon Black (RCB) for compounding and its specialty tire production as the tire manufacturing industry shifts towards sustainable practices, products, and eco-friendly solutions. [Read more >>](#)
