## **MB Crusher improve practicality in remote construction jobs**

BF80.3 - Sany SY200C - China

IMAGE SOURCE: MB Crusher

There is a lot of talk about remote construction jobs, being as personnel not physically present at the site, with questions like: how can we make work without struggles and losing money? [Read more >>](#)

## **A WOLFF crane in the botanical garden – Restructuring the European Patent Office in Vienna using Austria’s most powerful crane**

Working in the greenery with a view of the Belvedere Palace: Owing to good planning, the WOLFF 8060.25 Cross was positioned between the listed trees of the botanical garden of the University of Vienna.

IMAGE SOURCE: WOLFFKRAN

Austria's most powerful construction crane is currently at the center of Vienna – not far from the Belvedere Palace. The WOLFF 8060.25 Cross is restructuring the European Patent Office building on Rennweg on behalf of construction company PORR. Planned by the firm ATP architekten ingenieure, this restructuring operation will be carried out according to the latest environmental standards, and assembling and operating the red giant will even play a significant role in protecting the surrounding flora and fauna. ## Austrian landmark project: Aurach Bridge

Aurach Bridge

IMAGE SOURCE: Doka GmbH

With a height of 50 metres, the Aurach Bridge is the highest bridge on the Austrian A1 motorway. It is frequented by around 50,000 vehicles a day at peak times. Now after 60 years in service, the steel composite bridge needs to be completely renewed. As an experienced partner in balanced cantilever construction, the formwork specialist **Doka** is involved in the new construction of this important traffic link. [Read more >>](#)

## Technological Innovation, Expertise and Sustainability

SM-13e al Geofluid 2023

At the 24th edition of Geofluid **Soilmec** comes with a new exhibition layout, essential and well-finished, based on product, innovation, and sustainability issues. [Read more >>](#)

## Smart Farming: Continental Shows Intelligent Technologies for a More Sustainable Agriculture

Smart Farming: Continental is showing intelligent technologies for a more sustainable agriculture.

IMAGE SOURCE: Continental

Under the slogan “Our Smart Farming. For your harvest of tomorrow,” the technology company **Continental** will present its competences and forward-looking product solutions for the agricultural industry at this year’s Agritechnica. These include products and solutions such as AI-based systems, autonomous mobile robot solutions, sensors and tire technologies that ensure greater sustainability, safety and efficiency on the farm, in the greenhouse and on the field. With its smart farming solutions, Continental will enable productivity boosts in agriculture. Highlights during the trade show will be the new herbicide-free Weed Control System, a greenhouse robotic solution, the new cleat design for raptor draper belts, the Lite version of the ContiConnect – a digital tire monitoring system –, the ProViu 360 surround view system and the NightViu Working Lights. The world’s leading trade show for agricultural technology will take place from November 12 to 18, 2023 in Hanover, Germany. Continental will be present at hall 20, booth A19. [Read more >>](#)

## Liebherr crawler cranes build second largest wind farm in Switzerland

Emil Egger AG is erecting wind turbines in the Swiss Jura using a Liebherr LR 11000.

IMAGE SOURCE: Liebherr-Werk Ehingen GmbH

In an eight-week operation, two Liebherr crawler cranes from Emil Egger AG, based in St. Gallen, Switzerland, have erected the country's second largest wind farm. The six turbines now installed, manufactured by Enercon, are expected to produce 22 million kilowatt hours of electricity annually. An **LR 11000** as well as an **LR 1700-1.0** have completed the wind turbines, which are almost 140 metres high. [Read more >>](#)

## CNH Ag Tech wins big at Agritechnica Innovation Awards

New Holland CR

IMAGE SOURCE: CNH Industrial N.V.
