WIRTGEN GROUP Product Launch Overview - Year 2023

18 January 2024 by LECTURA GmbH

Check the full list of new heavy machinery models WIRTGEN GROUP ([Wirtgen](#), [Hamm](#), [Kleemann](#)) presented in 2023!

HX series – The new flagship

At bauma 2022, Hamm introduced the HX series to the market with the HX 70i and HX 90i models and is therefore replacing the DV+ series. The panoramic cab provides a view of the drum edges in any direction of travel.

Hamm presents a new generation of pivot-steered tandem rollers: The HX series. [Read more >>](#)

New mobile Stackers MOBIBELT for optimised logistics

The mobile stackers MOBIBELT MBT 20(i) and MBT 24(i) from Kleemann make large stockpiles and improved work site logistics possible.

IMAGE SOURCE: WIRTGEN GROUP

The mobile stackers MOBIBELT are used for efficient logistics processes on work sites. [Read more >>](#)

Many new features in earthworks and asphalt construction

Hamm is presenting numerous new series and models at CONEXPO/CON-AGG 2023: The HC CompactLine series, the HC series, electrically driven compact rollers from the HD CompactLine series, the HX series, the HP 100i articulated pneumatic-tire roller, and the HTC 15 trench roller (from top left to bottom right). They are also presenting a tandem roller from the HD+ series with two VIO drums.

Hamm is presenting a packed program at Conexpo/CON-AGG 2023, including several world premieres as well as innovative further developments. [Read more >>](#)

Three Trade Fair Premieres for CONEXPO 2023

Powerful on its own and in a team: The cone crusher MOBICONE MCO 90i EVO2 and jaw crusher MOBICAT MC 110i EVO2 from Kleemann.

IMAGE SOURCE: WIRTGEN GROUP

With five mobile crushing and screening plants and the operating concept SPECTIVE, **Kleemann** is presenting a wide-ranging selection from its extensive product portfolio at the CONEXPO. [Read more >>](#)

New pneumatic-tire roller HP 100i

Hamm offers the HP 100i articulated pneumatic-tire roller with the open platform and with the cab.

IMAGE SOURCE: WIRTGEN GROUP

Especially for the North American market, **Hamm** has developed the HP 100i articulated pneumatic-tire roller based on the internationally successful HD+ series. [Read more >>](#)

New generation of binding agent spreaders

Towed spreaders such as the Streumaster SW 112 TC are ideal for precision spreading of binding agents over large areas in both off-road and on-road applications.

IMAGE SOURCE: WIRTGEN GROUP

The new models of the MC and TC series set benchmark standards when it comes to filling, material conveying, spreading accuracy and operator-friendliness. [Read more >>](#)

Mobile impact crusher MOBIREX MR 100(i) NEO/NEOe extends product portfolio

The mobile impact crusher MOBIREX MR 100(i) NEO/ NEOe is the first family member of the new NEO line and is characterised by its efficiency and flexibility.

IMAGE SOURCE: WIRTGEN GROUP

With the mobile impact crusher MOBIREX MR 100(i) NEO/NEOe, **Kleemann** presents the first family member of the new NEO line. [Read more >>](#)

New cold milling machine W 150 F(i) for high milling performance in tight spaces

The enclosed cabin of the Wirtgen W 150 F(i) provides a comfortable working environment for the machine operator.

IMAGE SOURCE: WIRTGEN GROUP

The high-performance W 150 F(i) rounds off the top end of the compact milling machine class. [Read more >>](#)

Global market launch – Rock Crusher WRC 240(i)

The Wirtgen Rock Crusher 240(i) enables the crushing, processing and homogenisation of hard core, concrete fragments, cobblestones and stony ground.

IMAGE SOURCE: WIRTGEN GROUP

The WRC 240(i) breaks coarse rocks in-situ, as found in hand-packed pavement layers (e.g. Telford bases) or stony soils, and produces a homogeneous mix in a continuous process. [Read more >>](#)

W 220 XFi cold milling machine offers broader performance spectrum

The W 220 XFi cold milling machine from Wirtgen offers high productivity and low specific carbon emissions in all applications.

IMAGE SOURCE: WIRTGEN GROUP

Equipped with an efficient **John Deere** engine and multiple features for the active protection of the environment, the W 220 XFi combines sustainability and productivity. [Read more >>](#)

The Wirtgen Group presents an extensive portfolio of innovative and market-driven solutions for precise and efficient concrete paving at World of Concrete 2024

The Wirtgen AutoPilot 2.0 for stringless paving increases process efficiency and safety.

IMAGE SOURCE: WIRTGEN GROUP

The highlight at the World of Concrete show from 23-25 January 2024, is a complete concrete paving train from **Wirtgen** – comprising a placer/spreader WPS 102i, a slipform paver SP 124i and a texture curing machine TCM 180i. [Read more >>](#)
