LECTURA Agri BrandSurvey: Pöttinger

Agri BrandSurvey: Pöttinger

IMAGE SOURCE: LECTURA GmbH

The majority of respondents, regardless of region, said the best category of Pöttinger's products is hay and forage equipment. In the second place are forage harvesters.

Regarding things the brand should do better, people referred to the features of the equipment, starting with the paintwork, and ending by referring to the entire category of machines.

Did you know that over 80% of European respondents consider Pöttinger to be at least occasionally visible in the media? [Find out more!](#)

Singapore's first Potain MCT 1005 helps advance prefabricated construction

Singapore's first Potain MCT 1005 helps advance prefabricated construction

IMAGE SOURCE: Manitowoc

The first Potain MCT 1005 topless crane in Singapore is helping the country's Housing & Development Board (HDB) continue its pioneering work around innovative building techniques. It was erected in October and boasts all the necessary strength to complete the Yishun Central 1 (N9C3) housing development using Prefabricated Prefinished Volumetric Construction (PPVC). New tandem rollers from Hamm combine vibration and oscillation in one drum

New HD+ 120i V-VIO tandem roller: The VIO drums give operators the choice of compacting with either vibration or oscillation.

IMAGE SOURCE: WIRTGEN GROUP

The tandem rollers of the HD+ series have been a firm fixture in the product range of roller manufacturer **Hamm** for many years. Back in the summer of 2023, new models were launched spanning all weight classes, all featuring the relevant interfaces for digital applications. The Easy Drive operating concept was also introduced to machines with operating weights of 7 t and 8 t. In the shape of the HD+ 120i V-VIO, Hamm is adding another model capable of compacting with a choice of vibration or oscillation. The new tandem roller has been available in markets with exhaust emission standard EU Stage V/EPA Tier 4f since the start of 2024.

GM and Komatsu collaborate on hydrogen fuel cell-powered mining truck

Komatsu's 930E mining truck that will be powered by HYDROTEC fuel cells.

IMAGE SOURCE: Komatsu Europe International N.V.

General Motors and **Komatsu** will co-develop a hydrogen fuel cell power module for Komatsu's 930E electric drive mining truck, the world's best-selling ultra-class haul truck. GM, a leader in hydrogen fuel cell technology, and Komatsu, a global manufacturer of mining and construction equipment, will jointly design and validate the technology. [Read more >>](#)

Major Belgian factory investment marks development of new harvester set to enhance arable farm efficiency

New Holland CR11

IMAGE SOURCE: New Holland

In a major development in high-capacity harvesting set to help large farms gather their crops more efficiently and more sustainably, **New Holland Agriculture** is to launch worldwide the new CR11 combine harvester, allowing farmers to cover more hectares in less time to use fuel as efficiently as possible – and all thanks to significant investment in the brand’s factory in Zedelgem, Belgium. The machine’s gentle threshing action minimizes damage to the grain, while new developments within the CR11 ensure almost all grain retained as it passes through the harvester, meaning losses are close to zero, with only straw and chaff exiting at the rear.
