Stenderup Adds Bobcat Material Handling Range for Denmark

8 February 2024 by Bobcat

- Stenderup A/S, the authorized Bobcat dealer in Denmark, will offer a new range of Bobcat material handling equipment starting April 1, 2024.
- Troels Stausholm Jensen, Managing Director of Stenderup, highlights the success in increasing Bobcat's market share since 2022 and anticipates growth opportunities with the new range.
- John Coudyzer, District Manager for Bobcat Material Handling, notes Stenderup's history since 1936 and the expansion of Bobcat's portfolio in Denmark.
- The Bobcat material handling range includes diesel forklift trucks (2-16 ton), LPG forklift trucks (2-7 ton), and electric forklift trucks (1.2-10 ton), with a special line of three-wheeled electric forklifts for

light work (1.2-2 ton).

- The new material handling equipment complements existing Bobcat loaders and telehandlers, enhancing Stenderup's industrial and warehousing market presence in Denmark.
- Stenderup, led by the third and fourth generations of the Jensen family, employs over 40 staff in sales, service, and administration, providing comprehensive support across Denmark.

Rødning-based Stenderup A/S, the Authorised **Bobcat** dealer for Denmark, has announced that the company will be offering the new Bobcat range of material handling equipment for Danish customers from 1 st April 2024.

Troels Stausholm Jensen, Managing Director of Stenderup, said: "Since we were appointed as the Authorised Dealer for Bobcat in Denmark in 2022, we have been successful in increasing Bobcat's market share in the country. We are very excited by the opportunities offered by the new material handling range from Bobcat not only for our existing customers, but for a whole new audience in manufacturing, warehousing and general industry across Denmark."

John Coudyzer, District Manager for Bobcat Material Handling for Benelux and the Nordics, said: "Stenderup has a long and successful history dating back to 1936, supplying quality machinery and other products throughout Denmark. The material handling range represents the latest expansion in the Bobcat portfolio that already includes loaders, mini-excavators, telehandlers, light compaction and attachments, allowing Stenderup to offer new solutions for customers in an increasing number of industries across Denmark."

Bobcat Material Handling Product Portfolio

The Bobcat range for logistics and material handling consists of various product lines: a series of diesel forklift trucks with lifting capacities from 2 to 16 ton; a series of LPG forklift trucks with lifting capacities from 2 to 7 ton and a series of electric forklift trucks with lifting capacities from 1.2 to 10 ton. The latter segment also includes a line of electric forklifts with three wheels for light work from 1.2 to 2 ton.

Troels Stausholm Jensen added: "The new Material Handling portfolio provides an additional springboard for Stenderup and Bobcat to increase our presence in the industrial and warehousing market in Denmark. It is a perfect complement to the Bobcat loaders and telehandlers we supply equipped with attachments such as buckets, grabs, bale clamps, dump hoppers and pallet forks, for use in material handling applications in many industries."

Today, Stenderup is led by the third and fourth generations of the Jensen family. The company has over 40 employees divided into sales, service and administration, covering the whole of Denmark. This is backed up by the strong focus at Stenderup on service/aftermarket support for customers right across the country.
