Requesting machinery spare parts swiftly and efficiently – LECTURA partners with UrParts

19 April 2024 by LECTURA GmbH

It can be frustrating when something goes wrong with your machine at the worst possible time. Then you need to get a **spare part** quickly so you can fix the machine and keep it working. Such a problem can happen to anyone at any time, and that's why LECTURA has provided a convenient way of requesting spare parts for not only construction machinery in cooperation with UrParts, available for visitors of the LECTURA Specs website.

Recently, we launched a new and intuitive customer journey to make requesting spare parts even more comfortable, in correspondence with never stopping evolution of the digital world and user behaviour. Each month, hundreds of inquiries are sent to UrParts and their suppliers from LECTURA Specs visitors. More specifically, LECTURA generates more than 12,000 inquiries for spare parts every year.

How does it work?

The whole process is very simple, you either just search for the required spare part in the database of UrParts and select direct offers from providers or you fill in one form and LECTURA will in cooperation with UrParts contact all relevant suppliers for you. You will then receive a quotation from all available spare parts suppliers and choose according to your requirements.

1. Machine & Part details 2. Contact details 3. Summary

Part 1

Machine details

	Kubota KX080-4
	Year of manufacture
	2016
	Serial number
