DigiMessenger issue #16: Lifting and Access & Material Handling

29 May 2024 by LECTURA GmbH

DigiMessenger #16

Dear Readers,

Three months have passed in no time and LECTURA is back with another issue of the DigiMessenger magazine. This issue focuses on news from the lifting and material handling sectors with sub-topics of rental and power technology.

You can therefore check out a comparison of the latest mobile cranes and aerial work platforms introduced between 2023 and 2024. Also worth exploring is our ranking of the top 10 most powerful forklifts launched in 2023.

LECTURA has also recently attended several major events in the world of construction equipment and brings you in-depth coverage...namely an interview with MobilHybrid from the MAWEV Show 2024, our review of INTERMAT 2024 and also the Wirtgen Group Technology Days 2024.

Don't hesitate to start reading!

Patrik Eder, Editor

What can you find inside the magazine?

- Comparison of the latest mobile cranes and aerial work platforms
- Ranking of the top 10 most powerful forklifts launched in 2023
- Interview: MobilHybrid at the MAWEV Show 2024
