AMAZONE Cenius mounted cultivator now with hydraulic overload protection

The high release force of up to 800 kg ensures a consistent working depth.

IMAGE SOURCE: AMAZONEN-WERKE H. DREYER SE & Co. KG

AMAZONE has announced the introduction of the Cenius Ultra mounted cultivator featuring hydraulic overload protection and working widths of 3.00 m and 3.50 m. The C-Mix Ultra tines, integral to the cultivator, provide enhanced reliability and durability with automatic hydraulic overload protection, and adjustable release force ranging from 500 kg to 800 kg, catering to varied soil conditions. These tines ensure a consistent working depth up to 35 cm under challenging conditions. Adjustment of the system is facilitated from the tractor cab, promoting convenience and operational reliability. This new development by **AMAZONEN-Werke H. Dreyer** highlights significant adaptations in cultivator technology to meet diverse agricultural challenges across Europe. [Read more >>](#)

Distinctly Hyster, Built for You Forklifts from 1.6-Tonnes

Distinctly Hyster, Built for You Forklifts from 1.6-Tonnes

IMAGE SOURCE: Hyster®

Hyster Europe has introduced the **Hyster** A-Series forklifts, with a lift capacity of 1.6-2 tonnes, designed to be customizable for specific applications. These new models replace the H1.6/1.8/2.0FT(S) forklifts, sharing components with the larger H2.0-3.5A models. Features include improved visibility masts, operator assist options like lights and load weight display, and an optional Dynamic Stability System. The operator compartment is focused on comfort and productivity, offering a spacious design and a touchscreen display. These forklifts are suitable for industries handling building materials, metals, chemicals, and plastics, and are available through **Hyster**'s global dealer network. [Read more >>](#)

Bobcat Revolutionizes Construction with New 1-2 t Mini Excavators at Bauma 2025

New Bobcat 1-2 t Mini Excavators

IMAGE SOURCE: Doosan Bobcat EMEA

Bobcat is set to unveil its new 1-2 ton mini excavators and an upgraded E88 mini excavator at Bauma 2025, showcasing advancements in construction machinery with innovative technologies. The new mini excavator models, including E16, E17z, E19, and E20z, will feature over 500 new components and advanced systems for improved efficiency. The E88 model is upgraded for enhanced operator comfort and new configurations. Additionally, **Bobcat** will exhibit several future-focused concepts, such as the TL25.60e electric telehandler and the S7X all-electric skid-steer loader, highlighting its commitment to sustainability and technological advancement in the European, Middle Eastern, and African markets. TOBROCO-GIANT unveils new vibratory plate models at Bauma 2025

GP SERIES

New generation vibratory plates

IMAGE SOURCE: TOBROCO-GIANT

TOBROCO-GIANT introduced 14 new vibratory plate models at Bauma 2025, the world-renowned trade fair for construction machinery. The models offer gasoline, diesel, and electric drives with features such as a durable cast iron base plate, ergonomic handles, protective frame with lifting eye, optional water tank, cyclone air filter, vibration-damping handlebar, foldable transport wheels, and a stationary function for convenience. The electric models are emission-free, powered by lithium-ion batteries for up to 28 minutes of continuous use, and quickly rechargeable. Visitors can learn more at **GIANT**'s stand C6/211 during the event. [Read more >>](#)

Strong and sustainable: ArcelorMittal showcases steel solutions with low CO₂-emissions at Bauma

Flat

IMAGE SOURCE: ArcelorMittal

ArcelorMittal will present its low CO₂-emission steel solutions at the Bauma exhibition in Munich from April 7 to 13. The company will showcase a diverse range of steel products, including sheet piling, wire solutions, sheets, plates, and tubes with up to 81% reduced carbon footprint achieved through the XCarb® technology, which aims for net-zero emissions by 2050. Key products on display will include the EcoSheetPile™ Plus range and SmartSheetPile from the Sheet Piling and Wire departments, as well as wear-resistant steels like Creusabro®, and adaptable grades such as Amstrong® and Relia® from the Flat and Tubular Products segments. **ArcelorMittal**'s stands will be located in Hall C5, Stand 338 and Hall A6, Stand 518, demonstrating solutions for the construction and construction machinery industries with a focus on durability and environmental sustainability. SBM at BAUMA 2025: Innovation all along the line

The large SBM impact crusher REMAX 600 will be presented at BAUMA with a highly efficient add-on single-deck screen and double magnetic equipment.

IMAGE SOURCE: SBM Mineral Processing

The Austrian company **SBM Mineral Processing** will be presenting itself at the upcoming BAUMA with a highly innovative mix of world premieres, new developments and proven technologies. The full-package supplier in the fields of mineral processing and concrete mixing technology is also recalling its beginnings 75 years ago. Like numerous subsequent milestones, these were also associated with a ground-breaking innovation. [Read more >>](#)

Wacker Neuson: Bauma 2025 Highlights

Wacker Neuson zero emission

IMAGE SOURCE: Wacker Neuson SE

Under the motto of “Solutions built for you”, **Wacker Neuson** together with its sister brand **Kramer**, welcomes visitors to this year’s Bauma – to booth FN.916 in the open-air area North. Solutions for the daily challenges faced by customers on the construction site are the focus of the trade fair presence, in keeping with the motto. Visitors can look forward to exciting product innovations, personal exchange and an impressive live experience with the demo shows. [Read more >>](#)

PERI at bauma 2025: Innovations for a future-proof construction industry

The VCT Composite Track is one of the innovations that PERI will be presenting at bauma 2025.

IMAGE SOURCE: PERI SE

Under the motto “We are shaping the future together”, **PERI** will be showcasing the scope of its portfolio and presenting numerous innovations at the open-air north site (stand FN 718) from 7 to 13 April 2025 in Munich. In its own exhibition hall, the formwork and scaffolding manufacturer from Weissenhorn, Germany, will have plenty of surprises in store for visitors besides impressive exhibits, live demonstrations and face-to-face discussions. Many of **PERI**’s subsidiaries and partners will also be exhibiting their products at this year’s bauma trade fair. [Read more >>](#)

Digging boom and digging bucket: New equipment variants for the versatile demolition machine SENNEBOGEN 830 E Demolition Vario Tool Vario Tool

The SENNEBOGEN demolition machine 830 E Demolition Vario Tool is presented at bauma with the new digging boom and a digging bucket.

IMAGE SOURCE: Sennebogen

Flexible solutions are required in order to realize urban demolition projects holistically and to act not only effectively but also economically. This is because subsequent demolition recycling and preparatory activities for new construction projects are now an integral part of the repertoire of modern demolition contractors. Just in time for bauma, the multifunctional 51-ton **SENNEBOGEN** 830 Demolition Vario Tool machine is now available with two new equipment variants that also qualify it for this work and make it even more flexible in use: a particularly robust digging boom with a reach of 12 metres and an accompanying digging bucket with a capacity of 1.7 m³. Implementing future-proof assistance systems for cranes: Digital motor zoom camera with AI integration

MCDE5200 + MP5200

IMAGE SOURCE: Motec GmbH

Cranes lift loads weighing several tons over obstacles, usually in confined spaces. To support crane operators, powerful assistance systems are needed that ensure both greater safety and more comfort. The digital zoom camera system from **Motec** forms the basis for intelligent load visibility solutions that guarantee future-proof performance thanks to update capability and optional AI integration.
