Hundrup expands its rental fleet with the Palazzani Ragno XTJ 52+

6 March 2025 by Palazzani Industrie S.p.A.

Hundrup, a leading company in Germany for the rental of aerial platforms and construction equipment, has chosen the **Palazzani** Ragno XTJ 52+ to enhance their offering. This powerful and versatile machine is now part of their rental fleet, further strengthening their position in the market.

A strategic move for Hundrup Arbeitsbühnen-Vermietung

For over 30 years, **Hundrup Arbeitsbühnen-Vermietung** has been a trusted name in the rental business, offering a wide range of machinery including aerial platforms, cranes, forklifts, and telehandlers.

Founded as a family business, the company has evolved over time, continuously expanding its machine fleet to meet their dynamic market. Today with a fleet of over 350 machines, Hundrup provides high quality solutions to clients operating in the construction, maintenance and infrastructure sectors.

In search of a tracked platform of over 40m working height, Hundrup identified the Ragno XTJ 52+ as the ideal solution to expand their capabilities, particularly for tasks requiring significant height and stability.

"After a day of testing at Palazzani, we were impressed by the performance of the XTJ 52+," says Stefan Hundrup, CEO of the company. "We found the ideal solution that allows us to expand our offering with a high-reach tracked platform with exceptional performance for our rental fleet."

Why the Palazzani XTJ 52+?

The Ragno XTJ 52+ spider lift is a telescopic boom with flying telescopic jib platform stands out for its exceptional performance, offering a working height of 52 meters, a horizontal outreach of 19.5 meters, and a maximum basket capacity of 400 kg.

It's designed for maximum stability and precision, even on challenging terrain. In addition to its aerial platform functions, it can also operate as a mobile crane, with a hydraulic winch capable of lifting up to 980 kg, making it perfect for demanding sectors such as telecommunications and high-voltage line construction.

"We had long been searching for a Ragno platform with these features," adds Stefan Hundrup. "The XTJ 52+ not only meets our expectations but exceeds them, allowing us to expand the possibilities of use for our clients."

"Thanks to its versatility, this machine will be used for various applications," continues Hundrup. "It will primarily be employed in the construction of high-voltage lines, where height and stability are crucial for safe operation, as well as in the telecommunications sector, thanks to the use of the hydraulic winch, which facilitates installation and maintenance tasks."

A new partnership built on innovation

Hundrup's commitment to offering the best in machinery is mirrored by Palazzani's drive for innovation.

The company ensures their maintenance and repair to guarantee maximum efficiency and safety. They also have an IPAF-certified training center where operators are trained on the safe and effective use of platforms. The collaboration between Hundrup and Palazzani is rooted in a shared focus on quality, safety, and forward-thinking technology.

"We are thrilled to have entered in collaboration with Hundrup Arbeitsbühnen-Vermietung," comments Laura Gasparini – Export Sales Manager at Palazzani Industrie. *"It's always a pleasure to communicate and deal to*

quality oriented professionals. We are confident that the XTJ 52+ will be a key asset in helping them meet the increasing demands of their market and we'll provide our best support to them".
